### DETAILED ACTION

1. Claims 1-27 have been examined.

#### ***Double Patenting***

2. As per the claims listed below, The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,639,612 in view of Liu ("Liu", US#6,473,071).

Claims 1-27, as shown below, are individually similar in scope to those of claims 1-11 of patent No. 6,639,612, with the exception of storing the initial status of all checkboxes, and then comparing them to a first box. However, Liu teaches storing the initial status of all checkboxes in the set (Figure 6 item 240; *initial status entry stored in the status table*); comparing the initial status of the checkbox which a user drags the pointer and the new status of the first checkbox, (Column 7 lines 49-50); and if the stored initial status of a checkbox for which a drag event is detected is the same as the new status of the first checkbox (Column 7 lines 49-53), toggling the status. Therefore it

would have been obvious to an artisan at the time of the invention to combine the patented claims with the teaching of Liu. Motivation to do so would have been to provide anything but an empty set to compare the status to.
